

AV Optimization

Ultrasound uses sound waves to create real time images of the heart including a pacemaker evaluation. It is painless and non-invasive.

- You will be asked to undress from the waist up (gowns will be provided for ladies) and lay down on your left side.
- No dresses or bodysuits.
- No perfume/cologne, scented lotions, or powders on your chest area.
- You may use deodorant.
- No pre-test preparations are required.
- Exam time: 45-60 minutes.

This test does not replace an echocardiogram or a device check. If you have either of these tests scheduled, DO NOT cancel them.
